TTC-35 Corridor Engineering Team

| Section | Title and Description   |
|---------|---|
| 1       | <b>Estimate for IH-35 Planned Improvements</b> ( <i>Planned Improvements</i> )<br>These projects are on the books now and will be built under any scenario (e.g. even when Trans-Texas Corridor 35 is constructed). The table summarizes estimated costs and number of lanes that are planned to be added to IH-35, and compares with the 1999 IH-35 Trade Corridor Study's required number of lanes along IH-35. <b>Cost to complete: \$9.9 billion.</b> |
| 2       | <b>Estimate to Expand IH-35 by 1 Lane in each direction</b> ( <i>1-Lane Expansion</i> )<br>Cost estimate to expand IH-35 by one lane in each direction, adjust frontage roads, and bridges, acquire right of way, and relocate utilities. Two scenarios provided: Laredo-Oklahoma ( <b>Cost to complete: \$12.7 billion</b> ) and San Antonio-Oklahoma ( <b>Cost to complete: \$10.7 billion</b> ).   |
| 3       | <b>Estimate to Expand IH-35 by 2 Lanes in each direction</b> ( <i>2-Lane Expansion</i> )<br>Cost estimate to expand IH-35 by two lanes in each direction, adjust frontage roads, and bridges, acquire right of way, and relocate utilities. Two scenarios provided: Laredo-Oklahoma ( <b>Cost to complete: \$24.5 billion</b> ) and San Antonio-Oklahoma ( <b>Cost to complete: \$20.7 billion</b> ).   |
| 4       | <b>Estimate to Expand IH-35 as Required by 2025</b> ( <i>IH-35 Expansion Required by 2025</i> )<br>Cost estimate to expand IH-35 as required in the 1999 IH-35 Trade Corridor Study. <b>Cost to complete: \$36.5 billion.</b>   |
| 5       | <b>Aerial Photography</b> ( <i>Aerial Photos</i> )<br>Please refer to Volume II. Aerial photos indicating potential land use impacts for various expansion scenarios of existing IH-35 adjacent to the existing footprint. The aerial photography was completed in 2004 and was supplemented by actual field reviews in March 2007 to confirm and update the aerials based on current existing development.   |
| 6       | <b>Impacts Associated with Expanding IH-35</b> ( <i>Impacts</i> )<br>Impacts identified in Section 5, based on the expansion scenarios, are summarized according to type (business, cemeteries, parks, schools, etc.). Impacts are listed by name of business or key feature, county and map number. Refer to Volume II for aerial photos.  |
| 7       | <b>IH-35 Anticipated Tax Base Loss</b> ( <i>Tax Base</i> )<br>Summary of anticipated loss of property value, sales and state sales tax associated with the various IH-35 expansion scenarios, compared to the development of the Near-Term TTC facilities.  |
| 8       | <b>IH-35 Bypass (Loops) Analysis</b> ( <i>Bypass Analysis</i> )<br>Cost estimate to construct a 4-lane bypass (i.e. loops) and a 2-lane (2-NB/2-SB) expansion of IH-35 in the rural areas connecting the loops. Two scenarios provided: Laredo-Oklahoma ( <b>Cost to complete: \$19.5 billion</b> ) and San Antonio-Oklahoma ( <b>Cost to complete: \$15.7 billion</b> ).   |
| 9       | <b>TTC-35 Near-Term Facilities</b> ( <i>TTC-35 Facilities</i> )<br>Summary of Near-Term Facilities identified by the TTC-35 Master Development Plan: anticipated costs, timing, and a map of all Near-Term Facilities. <b>Cost to complete: \$8.8 billion.</b>  |
| 10      | <b>Comparison of IH-35 Expansions to TTC-35 Near-Term Facilities</b> ( <i>Expansion Comparisons</i> )<br>Compares costs of the four IH-35 expansion scenarios (Sections 1, 2, 3, and 4) with the TTC-35 near-term facility costs identified in the Master Development Plan.   |
| 11      | <b>Traffic Diversion</b> ( <i>Traffic Diversion</i> )<br>Summary of the 2006 TxDOT report estimating maximum potential diversion from IH-35 to TTC-35.  |
| 12      | <b>Freight Rail</b> ( <i>Freight Rail</i> )<br>Conceptual locations and cost estimates of the TTC-35 freight rail facility identified in the Master Development Plan. <b>Cost to complete: \$11.7 billion.</b>  |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

| <b>Table 1. San Antonio to Oklahoma</b><br><b>Including IH-35 E and IH 35 W</b><br><b>Summary of IH-35 and TTC-35 Capacity Expansion</b><br><i>(Based on lane requirements in the 1999 I-35 Trade Corridor Study)</i> |  |  |
|---|--|--|
|   | <b>Estimated Cost<br/>(2006 dollars)</b> | <b>Percent of Required<br/>Additional Capacity</b> |
| IH-35 Existing  | --                                       | --   |
| IH-35 Planned Improvements  | \$9,704,033,253                          | 27%  |
| TTC-35 Near-term Facilities   | \$8,819,627,000                          | 52%  |
| IH-35 Planned plus TTC-35   | \$18,523,660,253                         | 79%  |
| IH-35 Required by 2025  | \$36,509,000,000                         | 100%   |

**Notes:**

- The estimated cost for TTC-35 Near-term Facilities does not include the proposed concession payments to TxDOT.
- The estimated costs do not include operation and maintenance.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

#### Notes:

- Length and existing number of lanes based on TxDOT 2005 year end Roadway Inventory.
- 2010 Planned number of lanes based on TxDOT 2006 Statewide Mobility Plan and MPO Short-Range Transportation Plans.
- 2025 to 2030 Planned number of lanes based on MPO Long-Range Transportation Plans.
- 2025 Required number of lanes based on 1999 IH-35 Trade Corridor Study.
- Costs do not include ROW acquisition, which is \$2.83 billion.

| <b>Total Widening Cost =</b>  |       |                    |            | <b>\$10,700,900,000</b> |

**Notes:**

- Estimate includes IH-35 E and IH-35 W alignment. IH-35 E is 97.5 miles in length; IH-35 W is 85.5 miles in length.
- Construction cost is based on recent data from SH 130, SH 45SE, and Katy freeway projects.
- ROW cost is based on recent data from SH 130, SH 45SE, and data received from TxDOT districts. ROW cost assumes an additional 30 feet of new acquisition on each side of IH-35.
- The cost estimate is based on the assumption that IH-35 is built to at least six (6) lanes with the addition of the other lanes (lanes 7 and 8) occurring to the outside.
- The per lane-mile costs include reconstruction/relocation of frontage roads, on/off ramps, interchange modifications and existing overpass expansions.
- Existing capacity between San Antonio and Laredo, with planned upgrades will meet anticipated demand until at least 2030.

**Notes:**

- Estimate includes IH-35 E and IH-35 W alignment. IH-35 E is 97.5 miles in length; IH-35 W is 85.5 miles in length.
- Construction cost is based on recent data from SH 130, SH 45SE, and Katy freeway projects.
- ROW cost is based on recent data from SH 130, SH 45SE, and data received from TxDOT districts. ROW cost assumes an additional 60 feet of new acquisition on each side of IH-35.
- The cost estimate is based on the assumption that IH-35 is built to at least six (6) lanes with the other lanes (lanes 7, 8, 9 and 10) occurring to the outside.
- The per lane-mile costs include reconstruction/relocation of frontage roads, on/off ramps, interchange modifications and existing overpass expansions.
- Existing capacity between San Antonio and Laredo, with planned upgrades will meet anticipated demand until at least 2030.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

| Urban Design and Construction  | 244   | \$12,000,000       | Varies (2 to 12) | \$19,913,000,000        |
| Rural Design and Construction  | 348   | \$6,000,000        | Varies (0 to 12) | \$7,310,000,000         |
| ROW Costs  |       |                    |                  | \$8,032,000,000         |
| Urban Utility Relocation<br>(\$3,000,000 per CL mile)  | 244   |                    |                  | \$732,000,000           |
| Rural Utility Relocation<br>(\$1,500,000 per CL mile)  | 348   |                    |                  | \$522,000,000           |
| <b>Total Widening Cost =</b>   |       |                    |                  | <b>\$36,509,000,000</b> |

**Notes:**

- Estimate includes IH-35 E and IH-35 W alignment. IH-35 E is 97.5 miles in length; IH-35 W is 85.5 miles in length.
- Construction cost is based on recent data from SH 130, SH 45SE, and Katy freeway projects.
- ROW cost is based on recent data from SH 130, SH 45SE, and data received from TxDOT districts. ROW cost assumes an additional 30 feet of new acquisition on each side of IH-35 for each lane added.
- The per lane-mile costs include reconstruction/relocation of frontage roads, on/off ramps, interchange modifications and existing overpass expansions.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description   | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|---|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                              | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                     | County | Identified Impacts |                    |                            | Tab Number | Map Number |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description  | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                                | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                           | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|---------------------------------------|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                          | County    | Identified Impacts |                    |                            | Tab Number | Map Number |
|--------------------------------------|-----------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description  | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|--------|--------------------|--------------------|----------------------------|------------|------------|
|  |        | One Lane Expansion | Two Lane Expansion | Required Expansion by 2025 |            |            |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                        | County  | Identified Impacts |                    |                            | Tab Number | Map Number |
|------------------------------------|---------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description   | County  | Identified Impacts |                    |                            | Tab Number | Map Number |
|---|---------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                           | County   | Identified Impacts |                    |                            | Tab Number | Map Number |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                    | County   | Identified Impacts |                    |                            | Tab Number | Map Number |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                              | County   | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|----------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description  | County  | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|---------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                                  | County  | Identified Impacts |                    |                            | Tab Number | Map Number |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description  | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|--------|--------------------|--------------------|----------------------------|------------|------------|
|  |        | One Lane Expansion | Two Lane Expansion | Required Expansion by 2025 |            |            |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description   | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|---|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description   | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|---|--------|--------------------|--------------------|----------------------------|------------|------------|
|   |        | One Lane Expansion | Two Lane Expansion | Required Expansion by 2025 |            |            |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                                | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                             | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|---|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                                | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                           | County | Identified Impacts |                    |                            | Tab Number | Map Number |
|---------------------------------------|--------|--------------------|--------------------|----------------------------|------------|------------|

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 3: Laredo to Oklahoma  
Including IH-35 E and IH-35 W  
Impacts Associated With Expanding IH-35**

| Description                              | County     | Identified Impacts |                    |                            | Tab Number | Map Number |
|--|------------|--------------------|--------------------|----------------------------|------------|------------|
|  |            | One Lane Expansion | Two Lane Expansion | Required Expansion by 2025 |            |            |

| 2C Equipment  | Williamson |                    |                    | X                          | 6          | 40         |

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

| <b>Table 1. Summary Results of Property and Sales Impacts</b><br>(Based on published appraisal data, in 2005 dollars) |                                   |                               |                             |                                 |
|---|-----------------------------------|-------------------------------|-----------------------------|---------------------------------|
|   | <b>IH-35<br/>(9 county total)</b> |                               |                             | <b>TTC-35</b>                   |
|   | <b>One Lane<br/>Expansion</b>     | <b>Two Lane<br/>Expansion</b> | <b>Required by<br/>2025</b> | <b>Near-Term<br/>Facilities</b> |
| Total Appraised Value of Property removed from Tax Roll   | \$202,706,000                     | \$565,686,000                 | \$2,276,770,000             | \$38,700,000*                   |
| Estimated Annual Loss in Sales  | \$71,196,000                      | \$227,178,000                 | \$880,967,000               | Minimal**                       |
| Estimated Annual Loss in State Sales Tax Revenue (6.25%)  | \$4,451,000                       | \$14,199,000                  | \$55,060,000                | Minimal**                       |

**Notes:**

- Total appraised value for IH-35 includes nine counties: Bexar, Comal, Dallas, Denton, Hays, McLennan, Tarrant, Travis and Williamson.
- Appraised value for TTC-35 Near-term Facilities assumes the full 1200 feet would be acquired for all seven primary facilities. The Perryman Group estimated \$800 per acre for TTC-35, since the vast majority of rural land in Texas qualifies for “productivity valuation.”
- \* The values reflected do not include SH 130 Segments 1-6
- \*\* Minimal sales impact to existing businesses is anticipated for TTC-35 Facilities since a majority of the improvements will occur in non-commercial areas
- Appraised property values are based on published data. Sales are based on data obtained from the State Comptroller for each county. State sales tax revenue is based on the published State Tax Rate of 6.25%.
- To establish estimated annual sales for commercial properties adjacent to IH-35, the Sales/Value ratio was applied to the published appraised property values based on the proposed right of way needed for expansion.
- If the proposed right of way is greater than 25% of an entire parcel, this summary includes the full value of the land and improvements.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Table 2. Estimated Appraised Property Value Impacts**

*(Based on published appraisal data, in 2005 dollars)*

| County          | Total Appraised Value by County | Total Appraised Value of Property Adjacent to IH-35<br>(% of county total) | Total Appraised Value of Property removed from Tax Roll<br>(% of IH-35 total) |                          |                          |
|-----------------|---------------------------------|--|---|--------------------------|--------------------------|
|                 |                                 |  | One Lane Expansion  | Two Lane Expansion       | Required by 2025         |

**Notes:**

- Appraised property values are based on published data for each county.
- To establish estimated annual sales for commercial properties adjacent to IH-35, the Sales/Value ratio was applied to the published appraised property values based on the proposed right of way needed for expansion.
- If the proposed right of way is greater than 25% of an entire parcel, this summary includes the full value of the land and improvements.

**Table 3. Estimated Annual Sales Impacts**  
(Based on published sales data, in 2005 dollars)

| County          | Total Taxable Sales by County | Estimated Sales for Property Adjacent to IH-35<br>(% of county total) | Estimated Loss in Sales<br>(% of IH-35 total) |                         |                          |
|-----------------|-------------------------------|---|---|-------------------------|--------------------------|
|                 |                               |   | One Lane Expansion                            | Two Lane Expansion      | Required by 2025         |

**Notes:**

- Sales are based on data obtained from the State Comptroller for each county.
- To establish estimated annual sales for commercial properties adjacent to IH-35, the Sales/Value ratio was applied to the published appraised property values based on the proposed right of way needed for expansion.
- If the proposed right of way is greater than 25% of an entire parcel, this summary includes the full value of the land and improvements.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

| <b>Total</b>  | <b>\$6,377,962,000</b>            | <b>\$160,695,000</b>   | <b>\$4,451,000</b>   | <b>\$14,199,000</b>    | <b>\$55,060,000</b>     |

**Notes:**

- Sales are based on data obtained from the State Comptroller for each county. State sales tax revenue is based on the published State Tax Rate of 6.25%.
- To establish estimated annual sales for commercial properties adjacent to IH-35, the Sales/Value ratio was applied to the published appraised property values based on the proposed right of way needed for expansion.
- If the proposed right of way is greater than 25% of an entire parcel, this summary includes the full value of the land and improvements.

| <b>Table 1: Laredo to Oklahoma</b><br><b>Estimated Costs to Add Two Lanes (2NB &amp; 2SB) in Each Direction</b><br><b>to Existing IH-35 Constructing Bypasses Around Urban Areas</b> |                         |
|--|-------------------------|
| Description  | Total Cost              |
| IH-35  | \$5,177,600,000         |
| IH-35E   | \$1,032,800,000         |
| IH-35W   | \$736,500,000           |
| IH-35 ROW Costs  | \$414,700,000           |
| Bypass Costs (Includes ROW)  | \$12,144,300,000        |
| <b>Total Widening Cost =</b>   | <b>\$19,505,900,000</b> |

| <b>Table 2: San Antonio to Oklahoma</b><br><b>Estimated Costs to Add Two Lanes (2NB &amp; 2SB) in Each Direction</b><br><b>to Existing IH-35 Constructing Bypasses Around Urban Areas</b> |                         |
|---|-------------------------|
| Description   | Total Cost              |
| IH-35   | \$1,485,300,000         |
| IH-35E  | \$1,032,800,000         |
| IH-35W  | \$736,500,000           |
| IH-35 ROW Costs   | \$289,200,000           |
| Bypass Costs (Includes ROW)   | \$12,144,300,000        |
| <b>Total Widening Cost =</b>  | <b>\$15,688,100,000</b> |

**Notes:**

- Each bypass will require two interchanges with IH-35 and are estimated to cost \$100 Million per interchange.
- Each bypass is 4 lanes (2 in each direction).
- ROW costs are based on 450 foot width.
- Road construction costs are estimated at \$5,000,000 per lane mile based on SH 130 and SH 45SE projects.
- Utility adjustment costs are based on SH 130 and SH45SE projects.
- Unit costs for utility, relocation and right-of-way are the same as used for the IH-35 cost estimates in Sections 2, 3 and 4.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

| <b>Total =</b>   | <b>381</b>               | <b>\$12,144,300,000</b> |

**Notes:**

- Each bypass will require two interchanges with IH-35 and are estimated to cost \$100 Million per interchange.
- Each bypass is 4 lanes (2 in each direction).
- ROW costs are based on 450 foot width.
- Road construction costs are estimated at \$5,000,000 per lane mile based on SH 130 and SH 45SE projects.
- Utility adjustment costs are based on SH 130 and SH45SE projects.
- Unit costs for utility, relocation and right-of-way are the same as used for the IH-35 cost estimates in Sections 2, 3 and 4.

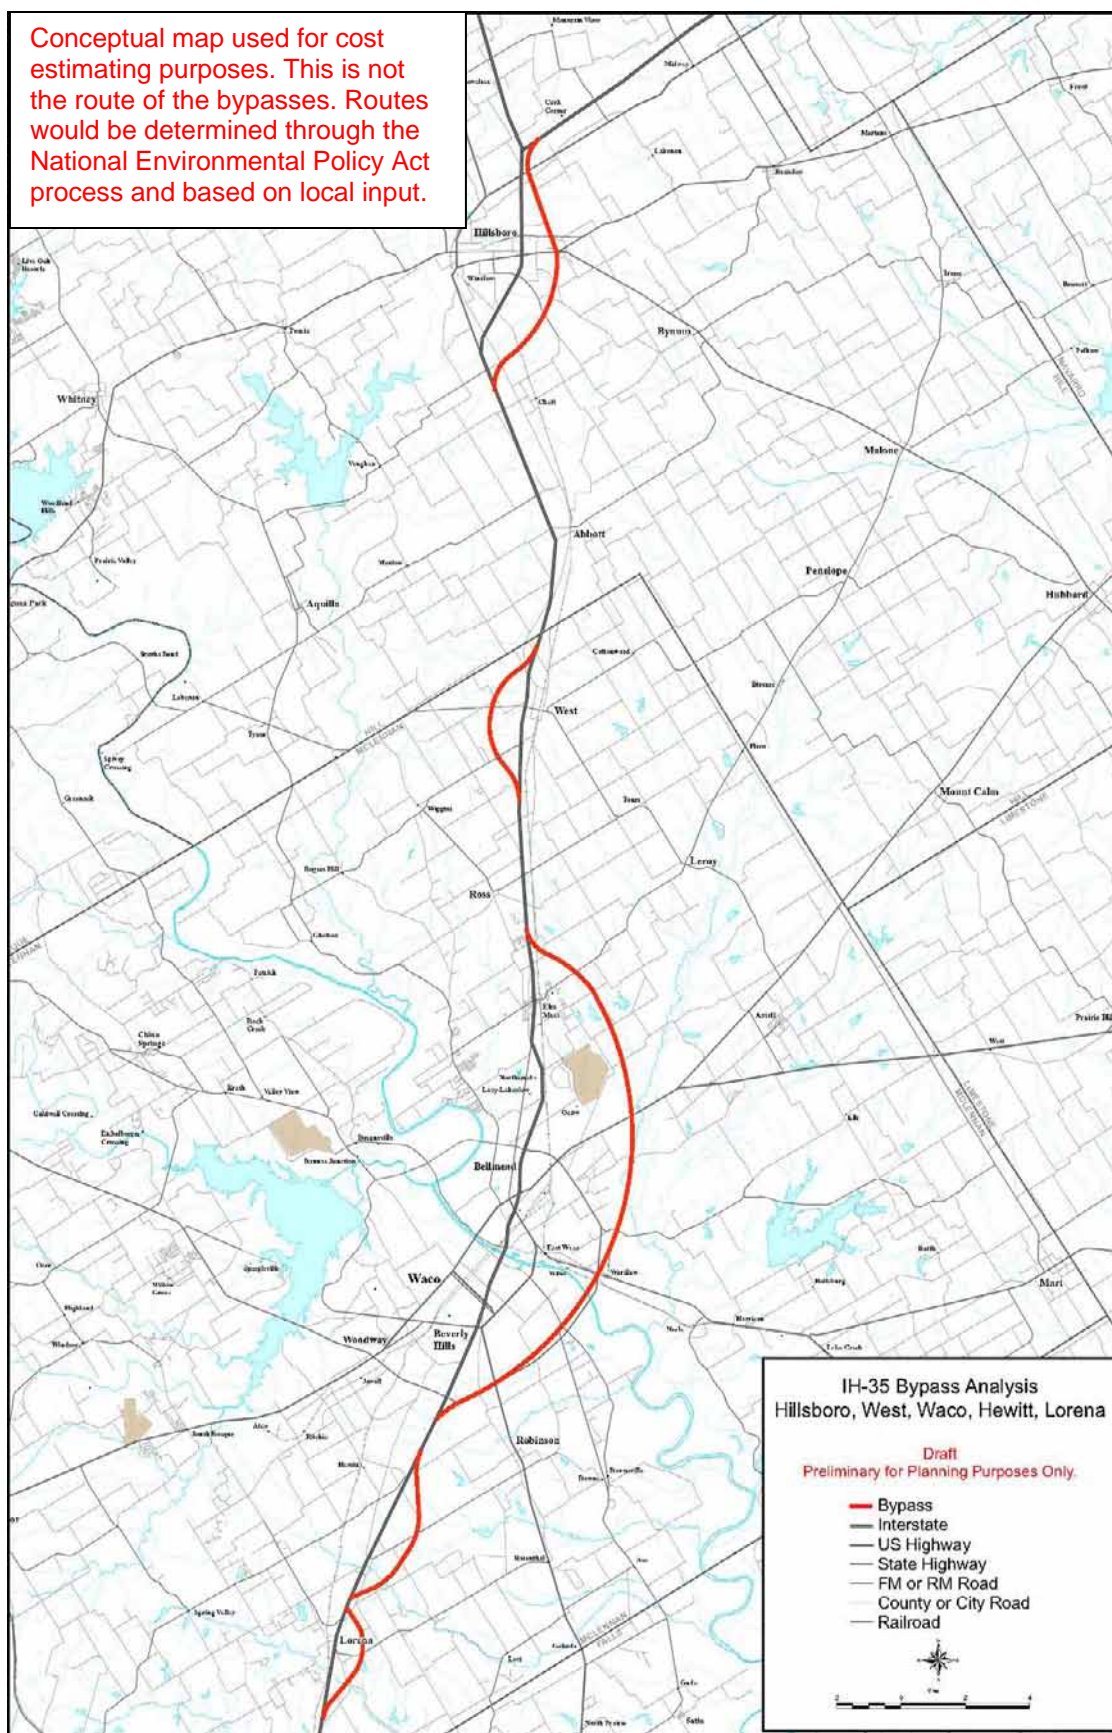

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

**Notes:**

- Source: Master Development Plan: TTC-35 High Priority Trans-Texas Corridor, September 2006.
- Facility Cost includes initial design, construction, and right of way acquisition.
- As part of the initial construction the 1200 foot right-of-way will be purchased for all TTC Near-Term primary facilities noted with an “\*”.
- Acquiring the full 1200 foot width for the Primary TTC Near-Term Facilities will have several important benefits:
  - It will allow flexibility to add additional roadway capacity, rail and utilities as needed in the future, with no additional right of way required.
  - It is estimated that acquiring the full 1200 feet in year 2010 will save \$7.4 billion dollars versus acquiring 600 feet in year 2010 and 600 feet in year 2035 (25 years later).

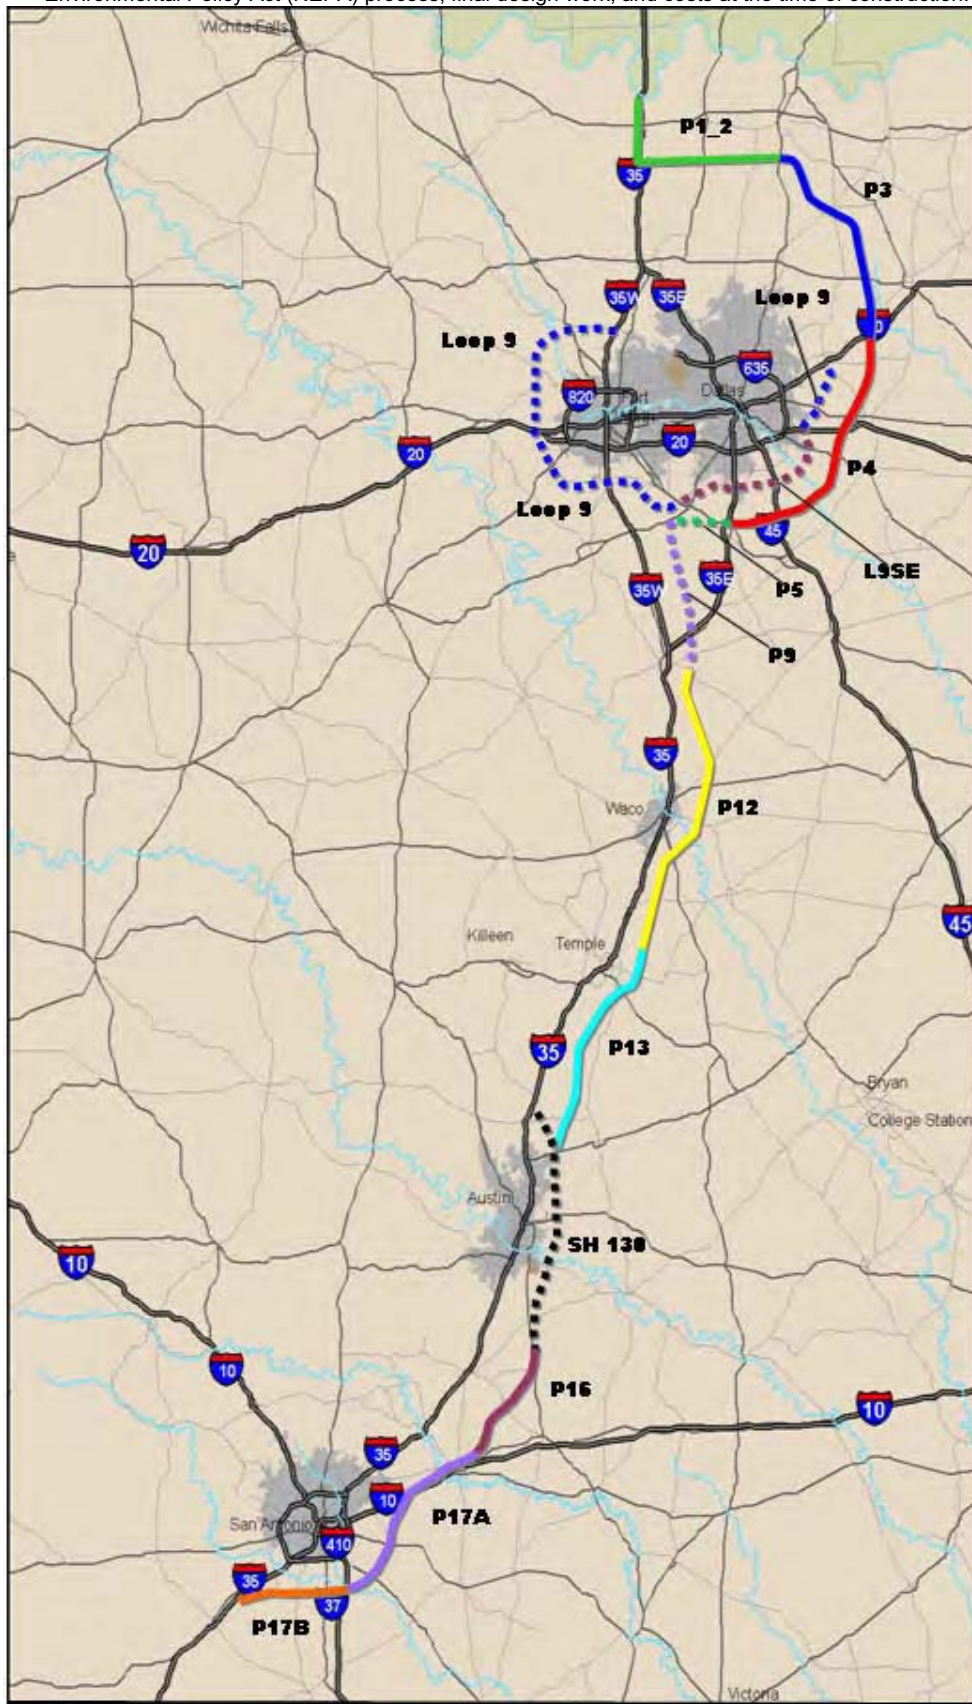

Figure 1. TTC-35 Near-Term Facilities

### Comparison of IH-35 Expansion vs. TTC-35 Near-Term Facilities

The cost estimate in Table 1 is based on the assumption that IH-35 E and IH-35 W are expanded based on the planned improvements identified in the TxDOT Statewide Mobility Plan and the MPO long range plans.

| <b>Table 1: San Antonio to Oklahoma<br/>Including IH-35 E and IH-35 W<br/>IH-35 Planned Improvements vs. TTC-35 Near-Term Facilities</b> |                            |            |                             |                         |
|--|----------------------------|------------|-----------------------------|-------------------------|
|  | IH-35 Planned Improvements |            | TTC-35 Near Term Facilities |                         |
|  | Public                     | Private    | Public                      | Private                 |
| Right of Way Acquisition   | \$2,829,866,000            | \$0        | \$0                         | \$1,117,640,000         |
| Design and Construction  | \$6,874,167,253            | \$0        | \$0                         | \$7,701,987,000         |
| Operation and Maintenance  | \$198,092,000              | \$0        | \$0                         | \$1,242,570,000         |
| Concession Fee and Revenue Share   | \$0                        | \$0        | \$0                         | \$1,960,442,000         |
| <b>Totals</b>  | <b>\$9,902,125,253</b>     | <b>\$0</b> | <b>\$0</b>                  | <b>\$12,022,639,000</b> |
|  |                            |            |                             |                         |
| Length of Improvements   | 260                        |            | 373                         |                         |

#### Notes:

- Costs are in 2006 dollars.
- Right of way includes the purchase price of land, improvements, damages, relocation assistance and administrative costs.
- As noted in Section 9, the full TTC-35 right-of-way width (1200') will be purchased as part of the initial development of individual TTC-35 facilities.
- Design and construction costs include reconstruction of bridges, interchanges, and utility relocations.
- Design and construction includes only the initial design and construction.
- Operation and maintenance costs include only routine maintenance, not the costs of major maintenance.
- TTC-35 Facility costs include tolling operations.
- Operation and maintenance costs for both IH-35 and TTC-35 were calculated for a 50-year period, beginning at service commencement. These assumptions are consistent with the TxDOT approved TTC-35 Master Development Plan (MDP).
- Concession payments may include upfront payments, revenue share over the 50-year term, or a combination.
- This comparison assumes all environmental analysis necessary to obtain environmental clearance will be conducted at TxDOT's expense.

The cost estimate in Table 2 is based on the assumption that IH-35 is expanded by one lane in each direction.

| <b>Table 2: San Antonio to Oklahoma<br/>Including IH-35 E through Dallas<br/>IH-35 One-lane Expansion vs. TTC-35 Near-Term Facilities</b> |                                 |                |                                    |                         |

|   |                          |            |                             |                         |
| Length of Improvements  | 364                      |            | 373                         |                         |

**Notes:**

- Costs are in 2006 dollars.
- Right of way includes the purchase price of land and improvements, damages, relocation assistance and administrative costs.
- As noted in Section 9, the full TTC-35 right-of-way width (1200') will be purchased as part of the initial development of individual TTC-35 facilities.
- Design and construction costs include reconstruction of bridges, interchanges, and utility relocations.
- Design and construction includes only the initial design and construction.
- Operation and maintenance costs include only routine maintenance, not the costs of major maintenance.
- TTC-35 Facility costs include tolling operations.
- Operation and maintenance costs for both IH-35 and TTC-35 were calculated for a 50-year period, beginning at service commencement. These assumptions are consistent with the TxDOT approved TTC-35 Master Development Plan (MDP).
- Concession payments may include upfront payments, revenue share over the 50-year term, or a combination.

The cost estimate in Table 5 is based on the assumption that IH-35 is expanded by two lanes in each direction.

| <b>Table 5: San Antonio to Oklahoma<br/>Including IH-35 E and IH-35 W<br/>Two-lane Expansion vs. TTC-35 Near-Term Facilities</b> |                          |            |                             |                         |

| Operation and Maintenance   | \$380,700,000                           | \$0            | \$0                                | \$1,242,570,000         |
| Concession Fee and Revenue Share  | \$0                                     | \$0            | \$0                                | \$1,960,442,000         |
| <b>Totals</b>   | <b>\$36,889,700,000</b>                 | <b>\$0</b>     | <b>\$0</b>                         | <b>\$12,022,639,000</b> |
|   |   |                |                                    |                         |
| Length of Improvements  | 449                                     |                | 373                                |                         |

**Notes:**

- Costs are in 2006 dollars.
- Estimate includes IH-35 E and IH-35 W alignment. IH-35 E is 97.5 miles in length; IH-35 W is 85.5 miles in length.
- As noted in Section 9, the full TTC-35 right-of-way width (1200') will be purchased as part of the initial development of individual TTC-35 facilities.
- Right of way includes the purchase price of land and improvements, damages, relocation assistance and administrative costs.
- Design and construction costs include reconstruction of bridges, interchanges, and utility relocations.
- Design and construction includes only the initial design and construction.
- Operation and maintenance costs include only routine maintenance, not the costs of major maintenance.
- TTC-35 Facility costs include tolling operations.
- Operation and maintenance costs for both IH-35 and TTC-35 were calculated for a 50-year period, beginning at service commencement. These assumptions are consistent with the TxDOT approved TTC-35 Master Development Plan (MDP).
- Concession payments may include upfront payments, revenue share over the 50-year term, or a combination.

### Maximum diversion from IH-35 as a result of TTC-35:

The potential traffic diversion from IH-35 to TTC-35 was calculated as the difference between the anticipated vehicle carrying capacity of IH-35 and the projected total vehicular demand for IH-35 in year 2030. Demand for IH-35 that exceeded anticipated capacity for IH-35 was assumed to divert to TTC-35. The anticipated IH-35 capacity, which is based on planned improvements, constrains the amount of traffic that could actually use IH-35. The table presents the maximum diversion potential from each segment of IH-35 to TTC-35.

| IH-35 Maximum Potential Traffic Diversion in 2030 |          |            |
|---|----------|------------|
| Segment   | Cars (%) | Trucks (%) |
| Around Dallas                                     | 10       | 27         |
| Dallas to Waco                                    | 14       | 26         |
| Waco to Austin                                    | 22       | 25         |
| Austin to San Antonio                             | 21       | 36         |
| Around San Antonio                                | 8        | 34         |

#### Notes:

- The constrained IH-35 scenario assumes capacity constraints based on current and future planned capacity improvements on IH-35.

The information and analysis in this report are based on estimates and assumptions that have the potential to change over time. Actual results depicted in these scenarios would likely vary depending on the National Environmental Policy Act (NEPA) process, final design work, and costs at the time of construction.

The map displays six proposed high-speed rail facilities across Texas, each with a callout box providing details:

- Rail Facility: A**  
Description: Metroplex West Loop  
Length: 150 Miles
- Rail Facility: B**  
Description: Austin Bypass: Temple to Seguin  
Length: 126 Miles
- Rail Facility: C**  
Description: San Antonio Bypass: Seguin to Devine  
Length: 76 Miles
- Rail Facility: D**  
Description: Waxahachie to Temple  
Length: 94 Miles
- Rail Facility: E**  
Description: Metroplex East Loop  
Length: 68 Miles
- Rail Facility: F**  
Description: Devine to Laredo  
Length: 123 Miles

The map also shows major highways (Interstates 35, 40, 45, 59, 75, 82, 89, 90, 10, 287, 44, 70, 30) and cities including Wichita Falls, Denton, Grapevine, Plano, Dallas Metro Area, Fort Worth, Abilene, San Angelo, Waco, Killeen, Temple, Austin, San Antonio, Houston Metro Area, Texas City, Galveston, Victoria, Corpus Christi, and Laredo. The Gulf of Mexico is visible to the east.
